About TEAM

EFFICIENCY DRIVEN AND CLIENT FOCUSED

Safe, Efficient, Productive

Next-Gen Technologies and Digital Solutions: Building on over 50 years of innovation to support digital transformation, energy transition, and workforce evolution.

Continuous Process Improvement: Setting industry standards and driving transformative change.

Enhanced Manufacturing Capabilities: Boosting efficiency and productivity while overcoming supply chain challenges.

Service Done Right the First Time and On-time

Focus on Quality Assurance and Control: Ensuring consistent, high-standard service delivery through continuous quality assurance, with 100% compliance 100% of the time.

Long-Term Partnerships with Clients: Managing client assets throughout their entire life cycle.

Standardized, High-Quality Deliverables: Delivering consistent, tailored services globally.

Best in Class Technical Workforce

Wide Portfolio of Services: Experts in inspection, repair, detection, and heat treating.

Multiskilled Workforce Efficiency: Boosting efficiency and safety with a diverse, multiskilled workforce.

Safe and Environmentally Responsible

Preventing and Addressing Environmental Issues: Aligning asset integrity with ESG goals to enhance environmental preservation and social responsibility.

Prioritizing Safety Above All: Ensuring the health and safety of our workforce, clients, partners, and communities.

Leveraging Asset Integrity for Enhanced Environmental Performance: Proactively maintaining assets to reduce environmental footprint, waste, and inefficiencies.

TEAM360 is a comprehensive service approach that encompasses everything from inspection to repair, ensuring our communities function safely and efficiently.

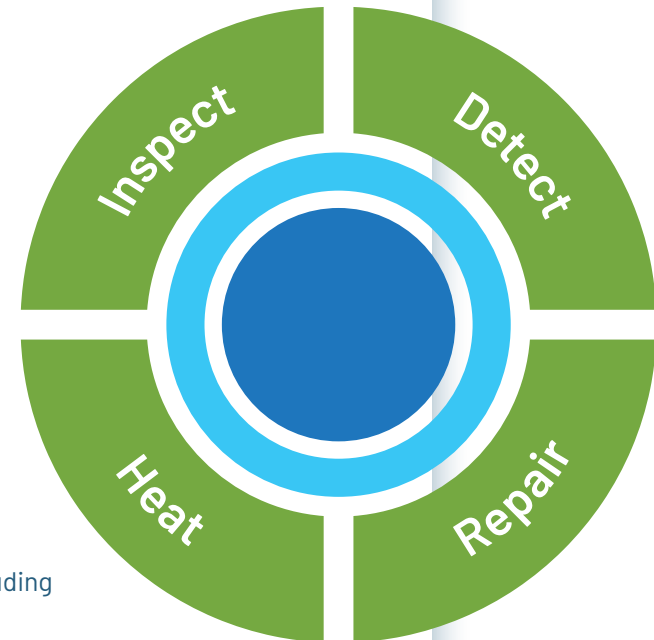

By relying on our experts to get the job done right the first time, our clients enjoy peace of mind, streamlined service, and cost savings.

Get To Know Us

For over five decades, TEAM Inc. has provided asset integrity to diverse industries, including oil and gas, aerospace, petrochemicals, pipeline, and power generation. We operate in over 220 locations across more than 20 countries worldwide. Our global presence spans multiple continents, including North America, South America, Europe, Africa, and Asia.

At Our Core

- **Safety First/Quality Always** – In everything we do
- **Integrity** – Uncompromising standards of integrity and ethical conduct
- **Service Leadership** – Leading service quality, professionalism, and responsiveness
- **Innovation** – Supports continuous growth and improvement
- **Pride and Respect** – For our clients, for each other and for all our stakeholders
- **Teamwork** – Global teamwork and collaboration

INSPECT 360

INSPECT 360

Precision in Every Validation

Inspection plays a crucial role in detecting potential issues early and optimizing maintenance strategies through a comprehensive suite of advanced inspection and testing solutions.

Leveraging cutting-edge technologies, these services help extend the lifespan of critical assets, safeguard operational continuity, and reduce downtime.

Advanced NDT

Utilizes state-of-the-art technologies for complex inspections.

Robotics and Drone Inspection

Provides efficient and safe inspections using robotic and aerial systems.

Laser Inspection

Captures precise 3D data for detailed analysis.

Infrared Thermography

Identifies thermal anomalies in systems to prevent failures.

Tank Inspection

Conducts thorough evaluations of storage tanks for compliance and safety.

Conventional NDT

Applies standard non-destructive testing methods to verify material integrity.

3D Imaging

Creates accurate visualizations of structures for precise inspection planning.

Data Collection

Gathers and analyzes inspection data to provide actionable insights.

DETECT 360

The image shows a large industrial facility, likely a refinery or chemical plant, with massive silver-colored pipes and storage tanks. Two workers in blue uniforms and hard hats are visible in the lower right, working on a pipe. The sky is blue with some clouds. A white banner with the text 'DETECT 360' is overlaid in the center. The logo consists of the word 'DETECT' in blue, '36' in green, and a green circular icon with a white crosshair.

DETECT 360

Safety and Environmental Protection

Detection plays a crucial role in maintaining asset integrity through its comprehensive environmental mitigation. By identifying and mitigating leaks and emissions, TEAM Inc. ensures that facilities operate efficiently and safely, preventing potential equipment failures and environmental non-compliance.

Our advanced technologies and solutions help clients reduce their environmental footprint, adhere to regulations, and enhance the reliability and longevity of their assets. This holistic approach not only safeguards the environment but also supports the sustainable operation of industrial facilities.

Leak Detection and Repair (LDAR)

Comprehensive LDAR services to ensure environmental compliance through efficient monitoring, repairing, and reporting.

Greenhouse Gas Control

Cost-effective solutions for controlling greenhouse gas emissions, including detailed emission reports.

Methane Emissions Reduction Solutions

Using advanced technology to detect and mitigate methane emissions, ensuring compliance and reducing overall emissions.

Optical Gas Imaging (OGI)

Quick and accurate detection of invisible gas leaks using OGI technology to manage and reduce emissions.

REPAIR360

REPAIR 360

Delivering Uninterrupted Operations

Our repair suite offers a range of specialized services designed to maintain and enhance the integrity of industrial assets. By providing innovative solutions for leak repairs, system modifications, precision machining, and valve maintenance, TEAM Inc. ensures that operations run smoothly and efficiently.

Our expertise in controlled bolting, weld testing, and composite repairs further supports the reliability and safety of critical infrastructure, helping clients minimize downtime and extend the lifespan of their equipment.

On-Stream Leak Repair

24/7 leak repairs without shutting down operations, minimizing downtime and costs.

Hot Tap, Line Intervention, Equipment and Parts

Safe modifications and repairs on pressurized systems without service interruptions.

Field Machining

High-precision on-site machining, saving time and costs.

Controlled Bolting Services

Comprehensive bolting services ensuring joint integrity and safety.

Valve Testing

Ensures the reliability and safety of valve systems through comprehensive testing.

Vapor Barrier and Hydrostatic Weld Testing

Verifying weld integrity with vapor barriers and localized hydrostatic testing.

Valve Repair Solutions and OEM Parts

Expert valve repairs and OEM parts for optimal performance.

Valve Insertion

Installing valves without system shutdowns for continuous operation.

Engineered Composite Repair

Reliable composite repairs for pressurized components, adhering to industry standards.

HEAT 360

HEAT 360

Optimizing Material Integrity

TEAM heat treating uses state of the art equipment to alter the physical and chemical properties of a material and improve hardness, strength, ductility, resistance, and overall performance.

Post Weld Heat Treating and Pre-Heat Applications

Ensuring weld integrity and material strength.

Bake Outs

Removing moisture and contaminants from equipment and systems.

Bolt Removal

Specialized services for the safe and efficient removal of bolts, even in challenging conditions.

Solution Annealing & Normalizing

Enhancing material properties and relieving internal stresses through controlled heating and cooling processes.

Paint & Refractory Curing Solutions

Providing effective curing solutions for coatings and refractory materials.

Thawing Solutions

Safely and efficiently thawing frozen equipment and pipelines to restore functionality.

Real-Time Remote Monitoring and Control

Advanced monitoring and control of heat treatment processes from remote locations.

Mobile & Configurable Heat Treat Setups

Flexible and portable heat treatment solutions tailored to specific site requirements.

Expansion Heating

Applying controlled heat to facilitate the expansion of materials and components during installation or maintenance.

Material Stabilization

Stabilizing materials to prevent deformation and ensure structural integrity under various conditions.

Furnaces

Available in both permanent installations and field-deployable units— our furnaces deliver uniform heat distribution across large metal components.

Turbine Warming Systems

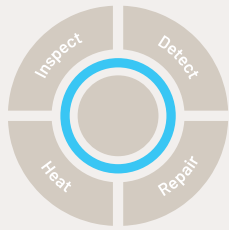

Ensuring turbines are pre-warmed to prevent thermal shock and enhance operational readiness.

Engineering Services

Expert engineering support and solutions to address complex technical challenges and optimize operations.

ONEINSIGHT®

ONEINSIGHT®

Digital Solutions That Power TEAM360

OneInsight® revolutionizes asset integrity by enabling continuous monitoring and early detection of issues, reducing the risk of unexpected failures and downtime. Clients benefit from enhanced safety and optimized maintenance schedules, which extend asset lifespan and reduce costs. Additionally, comprehensive data management provides a holistic view of asset health, aiding in informed decision-making and regulatory compliance.

Connected Worker

Enhances worker safety and productivity through real-time communication, data access, and digital workflows.

API Inspection

Provides thorough inspections and assessments of assets to ensure compliance with API standards and improve reliability.

Field Service Management

Streamlines field operations with digital tools for scheduling, tracking, and reporting, improving efficiency and service quality.

Remote Monitoring

Enables continuous, real-time monitoring of assets and processes, allowing for proactive maintenance and quick response to issues.

Asset Integrity Hub

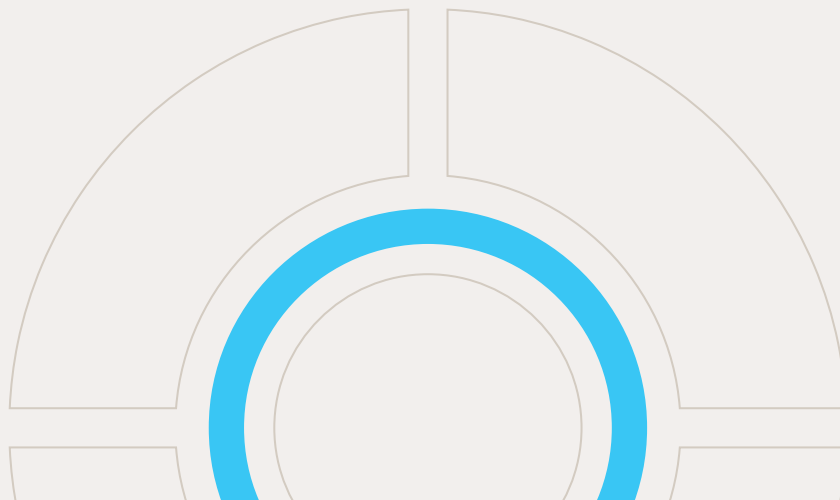

Centralizes data and insights on asset integrity, providing a holistic view for better decision-making and management.

Repair Hub

Mechanical service platform for managing and tracking all repair activities, including leak repairs and emissions mitigation.

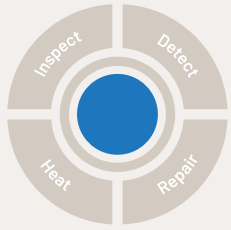

OneInsight Turnaround

Comprehensive turnaround management platform replacing the legacy "Team Digital" system.

ADVANCED ASSET & PROJECT SOLUTIONS

ADVANCED ASSET & PROJECT SOLUTIONS

Going Beyond Your Average Integrity Provider

By leveraging advanced techniques and technologies, we ensure that maintenance and project execution are carried out with precision and minimal disruption. Our expertise in accessing challenging areas, manufacturing high-quality components, and managing complex projects supports the seamless operation and longevity of critical infrastructure.

Rope Access

Safe and efficient rope access services for hard-to-reach areas.

Manufacturing Capabilities

Producing high-quality components and equipment tailored to client specifications and industry standards.

Turnarounds and Projects Solutions

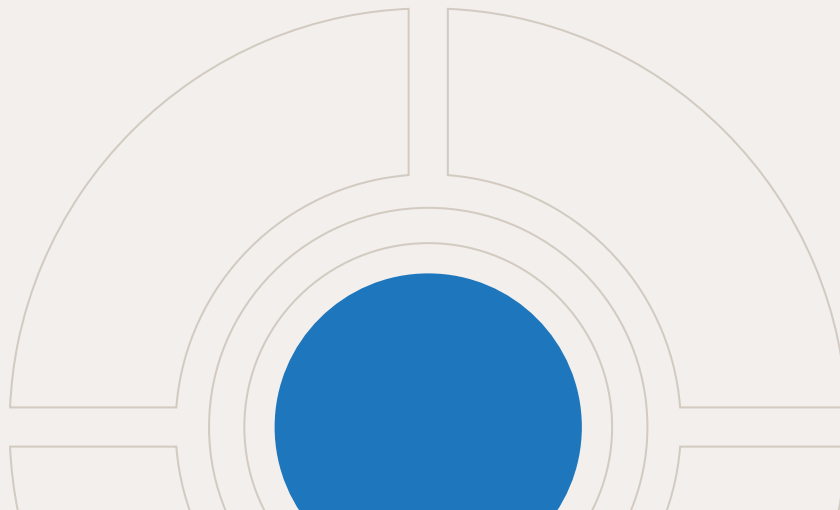

Ensures timely and cost-effective execution of maintenance and capital projects globally.

Engineered Line Lift

Providing precise lifting solutions for pipeline and infrastructure projects.

Asset Integrity Management Services

Offers comprehensive solutions for monitoring and maintaining the integrity of critical assets, reducing risks and extending asset life.

For over five decades, TEAM Inc. has provided asset integrity to diverse industries, including oil and gas, aerospace, petrochemicals, pipeline, and power generation. Our global presence spans multiple continents, including North America, South America, Europe, Africa, and Asia.
