

# In-Service Steam Tracing Repairs

Cut steam tracing losses without shutdowns or scaffolding

## Protect Every Drop (And Your Bottom Line)

Recent City Council approvals for water supply projects underscore the urgency. Partner with us now to future-proof your operations and cut steam tracing losses without shutdowns or scaffolding.

### Rapid Leak Detection & Sealing

Track down and seal steam leaks in live systems in hours, not days.

### Rope Access Efficiency

IRATA/SPRAT-certified crews reach elevated and congested areas without scaffolding, lifts, or congestion.

### Proven, Code-Compliant Repairs

Field-tested methods that meet industry codes and restore system integrity.

## Intersecting Uptime, Safety, and Stewardship

We help companies conserve resources today and lock in reliability and performance tomorrow.

### Conserve Water

Eliminate steam losses to reduce boiler water usage by up to 20-30%\*

### Cut Costs

Optimize heat tracing for 10-15% improved thermal efficiency\*

### Prioritize Productivity

Repairs are performed on-stream, so your units keep running at full capacity while we work.

### ESG Goals

Meet or exceed ESG goals by minimizing fuel use and greenhouse gases

## Why Choose TEAM?

Our solutions don't exist in isolation. TEAM360 connects inspection, repair, heat treatment, and digital oversight into one continuous, 360° asset integrity program.

- 50+ years of global asset integrity experience
- Safety-first, quality-driven culture with certified practitioners
- Integrated leak sealing, mechanical repair, and rope access

Backed by decades of asset integrity experience and certified specialists, we turn hidden losses into measurable gains.
