

TEAM[®]

Reach Higher.
Execute Smarter.

Integrated Rope Access & Mechanical Services

Safe Access. Specialized Trades. Reduced Downtime.

At TEAM, Inc., we combine advanced rope access capabilities with experienced mechanical and specialty trade services to help industrial facilities complete critical work safely, efficiently, and with minimal operational disruption.

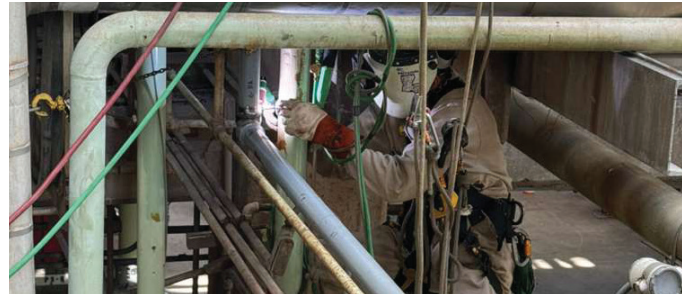

By integrating certified rope access technicians with multi-discipline mechanical expertise, TEAM delivers a flexible solution for difficult-to-access assets across refineries, petrochemical facilities, power generation sites, manufacturing plants, terminals, pipelines, offshore facilities, and heavy industrial operations.

Whether supporting shutdowns, turnarounds, capital projects, or routine maintenance, TEAM helps clients reduce scaffolding requirements, compress schedules, improve safety performance, and complete work at height faster.

Rope Access Capabilities

TEAM's rope access solutions provide safe, efficient access to elevated, confined, and hard-to-reach assets while supporting multiple industrial disciplines.

Access & Safety Services

- Standby rescue
- Fall protection and lifeline installation
- Anchor installation and proof load testing
- Safety netting applications for dropped object prevention
- Dropped object surveys and evaluations
- Ice mitigation services
- Housekeeping at heights including piperacks, towers, and structures

Elevated Maintenance & Support

- Piperack work including replacement and demolition
- Structural repairs and retrofits
- Pipe support repair and replacement
- Pipe shoe repair and replacement
- Flare work support
- Structural steel modifications
- Winterization support
- General maintenance at elevation

Industries Supported

TEAM supports clients across a wide range of industrial sectors, including:

Chemical Processing

Pipeline & Midstream

Refining & Petrochemical

Pulp & Paper

Offshore Operations

Marine

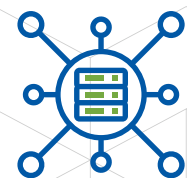

Manufacturing

Mining & Metals

Power Generation

Data Centers

Mechanical & Specialty Services

TEAM delivers experienced field crews capable of supporting critical mechanical scopes across operating facilities and shutdown environments.

Mechanical Services

- Valve installation, removal, and repair
- Relief valve installation and removal
- Unit isolation
- Equipment isolation
- Steam leak monitoring and evaluations
- Vessel repairs
- Pipefitting, fabrication, installation, and demolition
- Piping fabrication and retrofit
- Spring can installation, removal, and adjustment
- Flange management, torquing, and tensioning
- Hot bolting services
- Boilermaker support
- Lokring certified installation
- Welding services with R Stamp certified capabilities
- Leak Repair Solutions
- Composite engineered wrap systems
- Engineered leak repair clamps

These solutions help clients safely mitigate leaks while reducing the need for immediate shutdowns or costly production interruptions.

Heat Tracing & Industrial Support

TEAM supports critical process reliability and freeze protection programs through comprehensive tracing installation and maintenance services.

- Tracing Services
- Steam tracing installation and removal
- Swagelok certified steam tracing support
- Electrical tracing installation and removal
- Contact tracing installation and removal
- Operations & Facility Support
- Operations assistance
- Valve and chainwheel installation and removal
- I&E support
- Cable pulls and cable tray support
- Insulation removal and installation

Surface Protection & Asset Preservation

TEAM provides industrial surface preparation, protective coating, and preservation services designed to extend asset life and maintain facility reliability.

- Coatings & Surface Services
- Blasting and surface preparation
- Conventional industrial painting
- Thermal spraying
- Protective coating applications
- Fireproofing removal and installation

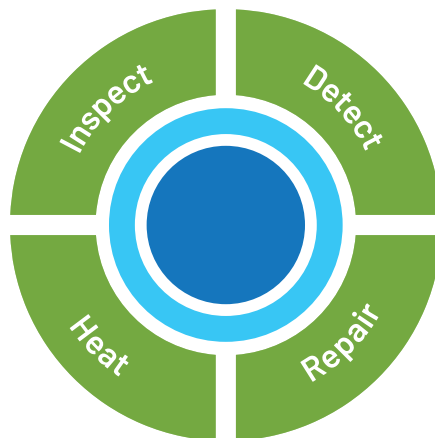

Why Clients Choose TEAM

- 50+ years of industrial services expertise
- Reduced scaffolding and access costs
- Faster mobilization and execution
- Minimized downtime and operational impact
- Multi-craft support through a single provider
- Improved safety performance in elevated work areas
- Experienced rope access and mechanical professionals
- Flexible support for maintenance, outages, and emergency response
- Turnkey execution from access through repair completion

For more than five decades, TEAM Inc. has delivered trusted asset integrity solutions across oil and gas, petrochemicals, aerospace, pipeline, power generation and mining. TEAM360 brings that full capability together in one integrated platform built to support the entire lifecycle of an asset. It is made up of **Inspect360**, **Repair360**, **Heat360**, and **Detect360**, along with specialized services that enhance safety, reliability, and operational performance.

From inspection and assessment to repair, heat treatment, leak detection, and advanced monitoring, **TEAM360** connects the strengths of our service lines into a single approach that keeps facilities running safely and efficiently.
